

Staging Blanks on Work-In-Process Carts:

- The bottom opening of T-Shirts and Hoodies should always be placed on the Handle End of the WIP Cart.
- When the Job is being processed only has one print location, stage the blanks on the WIP with that print location facing upwards.
- When Print Jobs have multiple locations, take a moment to review the mock-up for the job. Identify which print location appears to have the most complex artwork. The garments should be staged on the WIP carts with this location facing upwards.
 - Example:

Stage these blanks with the back facing upwards.
